REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-8 are allowable over the prior art because the prior art of record does not teach ion etching the air bearing surface to cause deficiencies of a constituent of the tunnel barrier in a portion of the tunnel barrier adjacent the air bearing surface; and replenishing at least a portion of the constituent in the portion of the tunnel barrier adjacent the air bearing surface.

Claims 9-18 are allowable over the prior art because the prior art of record does not teach ion etching the air bearing surface to cause a deficiency of a constituent of the tunnel barrier in a portion of the tunnel barrier adjacent the air bearing surface and replenishing the deficiency of the constituent in the portion of the tunnel barrier adjacent the air bearing surface.

The closest prior art of record to Tsukamoto et al. (U.S. Pat. 6,174,736) suggests ion etching but does not suggest replenishing the deficiency of the constituent in the tunnel barrier adjacent the air bearing surface. Tsukamoto et al. is silent on this replenishment or even if such removal of the constituent occurs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
